Organic Gin

Duncan has been busy producing the only certified organic gin made in Western Australia. Organic Gin is distilled several times to produce the most pure and natural spirit. The pure clear spirit is bottled directly from the still and has clean and elegant flavours of juniper, coriander, organic peel and other citrus notes.

The Gin is bottled on the estate and has no sulphites or any other chemicals or filtering agent added. Just grapes, juniper, coriander, organic peel, rosemary flowers and lemon scented gum leaves plus our rain water are the ingredients. All the organic ingredients except the juniper are estate sourced.

Batch No. one has sold out, however orders for batch number 3 are being taken now.

Drop Duncan a line if you would like a bottle or two.

What's Happening in the Vineyard?

Vintage 2019 is not over for us - we have nearly finished picking all of our fruit and soon it is time for the long-term barrel aging of our shiraz and malbec. There will be fortified wines (the only certified organic in Australia) this year due to the cooler month of March and little rain compared with 2017 deluge. To date this year we have had 6mm compared with over 60mm last year. Come out and see us, the weather is cool and your welcome will be warm.
